

## Zichain Tokenomics

Zitoken (ZCN) is the ERC20 token in the Ethereum blockchain. Zitoken is a payment token, so customers can purchase our services with ZCN, fiat money or any cryptocurrency such as Bitcoin or Ethereum. Services are divided into modules:

- **Blockchain Asset Management Platform (BAMP):** fund launch and administration
- **Trading Terminal:** access to exchanges, smart order types, managed accounts, API requests
- **Fiat Gateway:** exchanging digital assets for fiat and token listing for ICOs
- **Analytics & Marketing:** customized news and analytics, investment marketplace, testing of trading ideas

Zitoken acts as an internal currency fuelling the ecosystem of our services. Zitoken opens access to every module with a significant discount. Users have an opportunity to hold tokens and purchase **Zichain** services with 50% off the price or pay for them right off with ZCN and receive 30% discount.

During the initial stage of project development, high demand for tokens will be stimulated by the company's policy of buying back tokens and the use of ZCN to pay for services. 20% of Zichain's profit will be reserved for buying back and burning down ZCN on a quarterly basis until the token supply is down by half.

The suite of modules is tailored to fit the wide range of customers' requirements. For that reason, we introduce three tiers of service: Silver, Gold, and Platinum.

*Zichain Pricing Plans*

	<b>BAMP</b>	<b>Trading Terminal</b>	<b>Fiat Gateway</b>	<b>Analytics &amp; Marketing</b>
<b>Silver</b>	1 fund 100 investors	5 exchanges 3600 API requests/hour	25% cashback	customized news flow
<b>Gold</b>	5 funds 1000 investors	all major exchanges smart orders 10 managed accounts 100,000 API requests/hour	35% cashback token listing for ICOs	Silver features +white-label analytical reports +comprehensive market data
<b>Platinum</b>	Unlimited	Unlimited	50% cashback token listing for ICOs	Gold features +investment marketplace +testing of trading ideas

ZCN is based on a discount token model, it therefore possesses both a use value and a resale value. The use value is only accessible to active customers in a way of receiving discounts. The resale value can be leveraged by both token holders and active customers because they can sell tokens after applying discount for using Zichain services. As the Zichain network grows, the greater utilization of the services is just as the total value that ZCN brings to token owners.

## Token Details

	<i>Date</i>	<i>Token Price</i>	<i>Discount</i>	<i>Soft cap</i>	<i>Hard cap*</i>	<i>Vesting</i>
<b>Private Sale Round 1</b>	April 2 – May 20	US\$0.035-0.06	40-65%	US\$3 mln	US\$2.8 mln	3m/6m***
<b>Private Sale Round 2</b>	May 21 – Aug 31	US\$0.08	20%		US\$10 mln	no
<b>Private Sale Round 3</b>	Sep 1 - Oct 15	US\$0.087	13%			no
<b>Initial Exchange Offering</b>	Nov 5 - Dec 15	US\$0.1	0%		US\$25 mln**	no

\* Hard cap represents the limit on the total amount of token purchases before the corresponding stage (i.e. \$10 mln is the upper bound for tokens sold during both rounds). \*\* Or 50,000 ETH, whichever comes first. \*\*\* 50% of tokens of Private Sale Round 1 investors with purchase price \$0.035 (the first stage participants) will be locked up for 3 months after TGE ends, the other 50% will be locked up for 6 months. Tokens of Private Sale Round 1 investors with purchase price \$0.06 (the second stage participants) will be locked up for 3 months after TGE ends.

## Token Distribution

During the Token Generation Event (TGE), we plan to issue no more than 703,125,000 tokens, of which up to 450,000,000 can be sold to investors.

If all 450,000,000 tokens are sold, additional 253,125,000 tokens will be issued, of which:

- 147,656,250 tokens (21% of the total ZCN supply) will belong to the project team
- 70,312,500 tokens (10%) will be forwarded to the Advisory Board.
- 14,062,500 tokens (2%) will be a reward for participating in the Bounty Program
- 14,062,500 tokens (2%) will be a reward for participating in the Referral Program
- 7,031,250 tokens (1%) will be distributed through Airdrop

Team tokens will be locked up for 24 months. There is a possibility for 25% of the tokens to be unlocked, provided that the price of a

token grows 3 times compared to the last sales price at the TGE. An additional 25% of tokens can be unlocked in case a token price is 5 times higher than the last sales price at the TGE. If the fundraising goal is reached before the end of the TGE, the unallocated tokens will be burned.
